

Handling a CmActLicense for GGU software

Please note the following:

Keep the email with the software link that you received from Wibu Systems AG when you purchased the CmActLicense. You can use the software link to re-host the CmActLicense to another computer or restore it on your own computer.

Get information on updates and modifications on a regular basis from your program module page on our website at www.ggu-software.com. If you would like to be informed automatically about the development status of your licenses, simply sign up for the newsletter:

<https://www.ggu-software.com/en/changelogs/mailer>

Contents:

1	Activate a CmActLicense and install the GGU software	2
2	Re-host a CmActLicense to another computer.....	3
3	Restoring a CmActLicense on the same machine.....	6

1 Activate a CmActLicense and install the GGU software

To activate and install the GGU software via a CmActLicense, proceed as follows:

1) CodeMeter: Install/update CodeMeter Runtime Kit (if required)

At least version 7.10a of the CodeMeter Runtime Kit (CodeMeter License Management Driver) is required to use the GGU software.

For a new installation or update to the latest version of your CodeMeter Runtime Kit, download and run the installation file (32 and 64 bit) from the Internet:

<https://www.wibu.com/support/user/user-software.html>

2) CodeMeter: License activation

In order to transfer a CmActLicense to your computer, please first open the Internet page via the software link sent to you by cleverbridge/WIBU Systems AG (for example: <http://lc.codemeter.com/32710/depot/get.php?id=MCXVZ-XYXYX-ES5EX-9FCPL-XXXXX>).

The screenshot displays the CodeMeter License Central WebDepot interface. At the top, there is a green header with the GGU Software logo and the text "CodeMeter License Central WebDepot". Below the header is a yellow navigation bar with links for "Home", "My Licenses", and "Auto Update", along with a language selector set to "English".

The main content area is titled "Available Licenses" and contains a box with instructions: "To activate your licenses: 1. Select the licenses you want to activate. 2. Select the locally connected CmContainer to which you want to transfer the licenses. 3. Click 'Activate Selected Licenses Now'".

Below the instructions is a table of available licenses:

<input checked="" type="checkbox"/>	Name	Activated On	CmContainer	Status
<input checked="" type="checkbox"/>	GGU-FILTER-STABILITY NON Network Lizenz subscription			Available

Under the table, there is a "Select CmContainer" section with a dropdown menu set to "Get CmContainer automatically" and a button labeled "Activate Selected Licenses Now" with a hand cursor over it. A link for "Offline license transfer" is also visible.

At the bottom of the page, there is a footer with the text: "Legal Notice | © 2012-2014 WIBU-SYSTEMS AG CodeMeter License Central WebDepot v16.12.173.500.ws | 2019-12-17 08:24:18 (UTC)".

The available GGU licence is already selected (ticked).

The first time a CmActLicense is activated on your computer, the CmContainer is fetched automatically, i.e. a container number is assigned to your computer. If a CmActLicense has already been activated on this computer, the number assigned to the computer at that time is displayed, e.g. 130-259542004 (see figure on page 5).

Click on the yellow "Activate Selected Licenses Now" button. The progress of the online license transfer is displayed in a message box, which you exit via the "OK" button after successful license transfer. The browser window can then simply be closed.

3) GGU-Software: Installation

The installation routines for your GGU licences are available to download in our eDelivery zone at the following address:

<https://www.ggu-software.com/en/ggu-software-edelivery>

Start the installation routines by double-clicking the files after downloading.

In the case of subsequent updates, restart the installation routine for the respective GGU program. The installation program calibrates the files of the previously installed programs and replaces numerous older files.

If you are updating to a new major version, we recommend first uninstalling the old major version via Control Panel/Add or Remove Programs.

2 Re-host a CmActLicense to another computer

To transfer a CmActLicense from one computer to another, please first open the Internet page on the computer where the CmActLicense was installed using the same software link via which you transferred the license to your computer (for example: <http://lc.codemeter.com/32710/depot/get.php?id=MCXVZ-XYXYX-ES5EX-9FCPL-XXXXX>).

The screenshot shows the CodeMeter License Central WebDepot interface. At the top, there is a green header with the GGU Software logo and the text "CodeMeter License Central WebDepot". Below the header is a yellow navigation bar with links for "Home", "My Licenses", and "Auto Update", along with a language dropdown set to "English". The main content area is titled "My Licenses" and contains a table with the following data:

Name	Activated On	CmContainer	Status
GGU-FILTER-STABILITY NON Network Lizenz subscription	2019-12-17 07:39:58	130-561117342	Available: 0 (1)

Below the table, there are two yellow buttons: "Re-Host Licenses" (with a mouse cursor over it) and "Restore Licenses". At the bottom of the page, there is a yellow footer containing the text: "Legal Notice | © 2012-2014 WIBU-SYSTEMS AG CodeMeter License Central WebDepot v16.12.173.500.ws | 2019-12-17 07:54:30 (UTC)".

Click the "Re-Host Licenses" button.

A new page displays information about the procedure. Click on the yellow "Return Selected Licenses Now" button.

The screenshot shows the 'CodeMeter License Central WebDepot' interface. At the top left is the GGU Software logo. The navigation bar includes 'Home', 'My Licenses', and 'Auto Update'. A language dropdown is set to 'English'. The main content area is titled 'Re-Hostable Licenses' and contains a box with instructions: 'To re-host licenses from one CmContainer to another CmContainer: 1. Make sure that the CmContainer with Serial 130-209297866 is connected to this computer... 2. Select the licenses you want to re-host. 3. Click "Deactivate Selected Licenses Now". 4. After the successful deactivation of the selected licenses, you can activate them again in another CmContainer.' Below this is a table with columns: Name, Activated On, CmContainer, and Status. One license is listed: 'GGU-FILTER-STABILITY NON Network Lizenz subscription' with status 'Activated'. A yellow button 'Deactivate Selected Licenses Now' is highlighted with a mouse cursor. A link 'Offline license transfer' is also visible. At the bottom, there is a 'My Licenses' link and a footer with legal notice and version information.

<input checked="" type="checkbox"/>	Name	Activated On	CmContainer	Status
<input checked="" type="checkbox"/>	GGU-FILTER-STABILITY NON Network Lizenz subscription	2019-12-17 08:02:39	130-209297866	Activated

After successful completion, exit the online license transfer message box via the "OK" button. The returned license is now displayed again as "Available".

The screenshot shows the 'CodeMeter License Central WebDepot' interface after the license transfer. The navigation bar and language dropdown remain the same. The main content area is titled 'My Licenses' and contains a table with columns: Name, Activated On, CmContainer, and Status. The license 'GGU-FILTER-STABILITY NON Network Lizenz subscription' is now listed with status 'Available: 1 (1)'. A yellow button 'Activate Licenses' is visible below the table. The footer with legal notice and version information is also present.

Name	Activated On	CmContainer	Status
GGU-FILTER-STABILITY NON Network Lizenz subscription			Available: 1 (1)

Now switch to the computer on which you want to import the returned CmActLicense. If at least version 7.00 of the CodeMeter Runtime Kit (CodeMeter License Management Driver) is not yet installed on this computer, first download the installation file (32 and 64 bit) from the Internet and run it:

<https://www.wibu.com/support/user/user-software.html>

Open the Internet page via the software link sent to you by WIBU Systems AG (for example: <http://lc.codemeter.com/32710/depot/get.php?id=MCXVZ-XYXYX-ES5EX-9FCPL-XXXXX>).

The appearance of the Internet page is the same as that already explained above for initial activation. The figure below shows the CmContainer display on a computer on which a CmActLicense has already been installed.

The screenshot displays the CodeMeter License Central WebDepot interface. At the top, there is a green header with the GGU Software logo and the text "CodeMeter License Central WebDepot". Below the header is a yellow navigation bar with links for "Home", "My Licenses", and "Auto Update", along with a language dropdown set to "English". The main content area is titled "Available Licenses" and contains a box with instructions: "To activate your licenses: 1. Select the licenses you want to activate. 2. Select the locally connected CmContainer to which you want to transfer the licenses. 3. Click 'Activate Selected Licenses Now'." Below this is a table of licenses:

<input checked="" type="checkbox"/>	Name	Activated On	CmContainer	Status
<input checked="" type="checkbox"/>	GGU-FILTER-STABILITY NON Network Lizenz subscription			Available

Below the table, there is a "Select CmContainer" dropdown menu showing "130-209297866 (Universal Firm Code CmActLicense 6000105)". A yellow button labeled "Activate Selected Licenses Now" is present, along with a link for "Offline license transfer". At the bottom, there is a "My Licenses" link and a footer with legal notice and copyright information: "Legal Notice | © 2012-2014 WIBU-SYSTEMS AG CodeMeter License Central WebDepot v16.12.173.500.ws | 2019-12-17 08:07:58 (UTC)".

If you click on the "Activate Selected Licenses Now" button on your new computer, the returned CmActLicense will be entered on the new computer.

3 Restoring a CmActLicense on the same machine

You may not be able to return your CmActLicense because you did not have access to your computer at short notice (hardware defect). In this case, it is possible to restore your CmActLicense on this computer after a new operating system has been installed, for example.

The current version of the CodeMeter Runtime Kit (CodeMeter license management driver) must first be installed on the newly installed computer. To do this, download and run the installation file (32 and 64 bit) from the Internet:

<https://www.wibu.com/support/user/user-software.html>

Open the Internet page once again on the newly installed computer using the same software link that you used to transfer the license to your computer (for example:

<http://lc.codemeter.com/32710/depot/get.php?id=MCXVZ-XYXYX-ES5EX-9FCPL-XXXXX>).

The screenshot shows the CodeMeter License Central WebDepot interface. At the top left is the GGU Software logo. The main header is 'CodeMeter License Central WebDepot'. Below the header is a navigation bar with 'Home', 'My Licenses', and 'Auto Update' links, and a language dropdown set to 'English'. The 'My Licenses' section contains a table with the following data:

Name	Activated On	CmContainer	Status
GGU-FILTER-STABILITY NON Network Lizenz subscription	2019-12-17 07:39:58	130-561117342	Available: 0 (1)

Below the table are two buttons: 'Re-Host Licenses' and 'Restore Licenses'. The 'Restore Licenses' button is highlighted with a mouse cursor. At the bottom of the page is a footer with legal notice and version information: 'Legal Notice | © 2012-2014 WIBU-SYSTEMS AG CodeMeter License Central WebDepot v16.12.173.500.ws | 2019-12-17 07:56:16 (UTC)'.

Click the "Restore Licenses" button. The page that opens displays the conditions necessary for restoring the CmContainer and the CmActlicense. You must accept the conditions so that you can use the then active button to restore your computer as a CmContainer and have the CmActlicense entered for the GGU software.

The screenshot shows the license restore conditions page. At the top is a section titled 'Select CmContainer' with a dropdown menu set to 'Get CmContainer automatically' and a refresh icon. Below this is a checkbox labeled 'I accept the Conditions for license restore.' which is checked. A yellow button labeled 'Restore Selected Licenses Now' is highlighted with a mouse cursor. To the right of the button is a link labeled 'Offline license transfer'. Below the button is a link labeled 'My Licenses'. At the bottom of the page is a footer with legal notice and version information: 'Legal Notice | © 2012-2014 WIBU-SYSTEMS AG CodeMeter License Central WebDepot v16.12.173.500.ws | 2019-12-17 07:56:50 (UTC)'.
